

The ALbelt "Heavy duty" system features a special configuration for the food sector, combining robust mechanical components with sophisticated, easy-to-use software.

Machine:	ALbelt + 4 ALritma M
Products:	Packages of sliced bread
Labelling:	Top labelling

ALbelt "heavy duty" with 4 ALritma M label applicators

Product format 1

Product format 2

The system applies top labels to two different types of products (packages of sliced bread and hamburgers, even of different formats) simultaneously thanks to a single-belt conveyor split into two lanes. Two ALritma M labelling heads (for labels up to 200 mm in width) are installed for each section, managed by a non-stop control system which allows continuous labelling of products. When the control system detects the end of the label reel on the first labelling head, it disables it and activates the next one, allowing reloading to be performed without having to stop the labelling process. The same logic is also used on the other section, as the two non-stop systems are independent. Everything is managed via a 9" mobile touchscreen panel, which offers an excellent compromise between size and legibility.
